PROFILE

Engineering graduate with hands-on project experience translating complex business data into clear operational and product insights.

Focused on presenting clear findings that help teams make informed operational and product decisions.

EDUCATION

Sant Gadge Baba Amravati University

Bachelor of Engineering in Electronics and Telecommunication Engineering

2022 – 2026

SKILLS

Technical: Data Analysis, Data Cleaning, Data Validation, Data Quality, Business Analysis, Operational Data Analysis, MIS Reporting, Management Reporting, Dashboard Development, KPI Reporting, Root Cause Analysis, Process Improvement.

Tools: Advanced Excel (PivotTables, XLOOKUP, VLOOKUP, Power Query, VBA, Macros), SQL, Power BI (DAX), Python (Pandas, NumPy), PostgreSQL, Tableau, Google Sheets, Microsoft PowerPoint.

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation, Forage – Jan'25 ([link](#))
- Tata GenAI Powered Data Analytics Job Simulation, Forage – Nov'25 ([link](#))

EXPERIENCE

ExcelR	<i>Pune, India</i>
Data Analytics Training & 9-Month Internship	June 2026 – Present
• Receiving practical training in Excel, SQL, Python, Power BI and Tableau fundamentals. • Applying data cleaning, exploratory analysis, visualization and dashboard-development techniques through guided assignments. • Building practical analytical projects that convert raw datasets into structured business insights.	

PROJECTS

SaaS Growth Intelligence	Mar 2026 – Apr 2026
• Analyzed 1.4M+ user activities to identify where users dropped off before becoming paid customers. • Used Python, SQL, DuckDB, funnel analysis, cohort analysis, and A/B testing to study customer behavior. • Identified the largest onboarding drop-off and confirmed that a new onboarding process increased user activation by 3.2%.	
SupplyIQ: Supply Chain Analytics	Jan 2026 – Feb 2026
• Analyzed 105K+ shipment records across 400 products, 75 suppliers, and 30 warehouses to evaluate supply chain performance. • Used SQL and Python for analysis and built a star-schema data model with Power Query and DAX. • Created an 8-page Power BI dashboard to track OTIF, fill rate, inventory turnover, supplier performance, revenue, and profit.	
Salesforce RevOps Automation	Jun 2026 – Jul 2026
• Designed Salesforce security architecture using Roles, OWDs, Permission Sets, and Sharing Rules for a simulated 500-user B2B SaaS organization. • Built Record-Triggered Flows and a 0–100 Lead Scoring model based on lead attributes. • Created Revenue Forecasting & Pipeline Analytics using Salesforce, Excel, and Power BI with quota and regional performance tracking.
